\*1 The sum of the output current of the backup port and the non backup port could not be more than 63A

\*2 Seamless switching is disabled by default and needs to be manually enabled.

\*3 The position feedback signal must be a passive port that works with an external circuit and can work at a current of less than or equal to 0.7 mA@12 V.  
The low impedance of the circuit for the position feedback signal is less than or equal to 100 ohms.

\*4 1 SG ready Heat Pump can be connected directly. Others can be connected via shelly devices.

\*5 On grid Mode: 25–30°C, no derating; 30–50°C, linear derating from 63A to 43A;  
Off grid Mode: 25–40°C, no derating; 40–50°C, linear derating from 60A to 50A

\*6 The supported firmware version of shelly devices can be found in user manual.
